DETAILED ACTION

This application is a divisional of application 09/609,133 now US Patent 6,696,279.

The preliminary amendment filed February 20, 2004 canceling claims 1-49, 67-74 and 89-94 has been entered.

Claims 50-66 and 75-88 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 50-52, 55-59, 60 and 84-88, drawn to methods of treatment using a nucleic acid, classified in class 514, subclass 44.
- II. Claims 50, 51, 53-59, 61, 62 and 75-83, drawn to methods of treatment using an antibody, classified in class 424, subclass 130.1.
- III. Claims 63-66, drawn to methods of treatment using a MAT I b subunit polypeptide, classified in class 424, subclass 94.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are patentably distinct as drawn to materially different processes requiring the use of different products such as nucleic acid, antibody and polypeptide. These methods comprise different steps and conditions and have different utilities. Inventions are unrelated if it can be shown that they are not

Art Unit: 1652

disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are drawn to materially different methods requiring the use different products, comprising different steps, carrying out at different conditions and having different utilities.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1652

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
